SIGN-UP INFORMATION

The completed form, check, and copy(ies) of AMA Membership Card can be submitted **in-person** as follows:

- (1) Sunday of each week around 9 AM PST at the flying field (weather permitting and subject to officer availability)
- (2) Monthly club meeting that occurs at 7:30 PM PST the third Wednesday of each month at the following location:
The Goebel Center on Janns Rd just east of the 23 frwy

* Field use fee required for new members only. Members are required to renew membership each January or forfeit membership. All fees paid are non-refundable

** Copy of AMA card required at sign-up and the member is required to keep the card current; Click or go to the following link to become a New AMA member or Renew an existing AMA Membership: <http://www.modelaircraft.org/membership/membership/applications.aspx>

CVF SITE SPECIFIC PROCEDURES

Approved club vote 8/15/2012

Published 10/9/2012

Mandatory Procedures:

- 1) **IN CASE OF FIRE:**
 - Alert everyone at the field of the situation.
 - Call 911 (Field location: Extension of North Wendy Drive, coordinates: 34° 11' 53" N, 118° 56' 32" W)
 - Extinguish the fire only if safety permits
- 2) No smoking on field premises
- 3) A fire extinguisher and shovel must be available in the pit area
- 4) No flying is allowed when weather "red flag" warnings are in effect.
- 5) In the event of a crash, the pilot must throttle back immediately to reduce fire danger
- 6) No taxiing toward the pit area
- 7) Flying must be in accordance with the current AMA National Safety Code
- 8) All pilots must stay behind the upwind protective barrier during normal flying
- 9) The last person to leave the field must insure that club equipment is LOCKED in the storage bin and the field gate is LOCKED
- 10) Free flight, control-line or turbine-powered planes are not allowed to be flown at the field
- 11) Unattended electrics must be on the ground facing and close to the pit fence
- 12) LiPo battery charging at the field must be done with the battery enclosed in a fireproof container

I fully understand the above noted safety rules.

CVF SITE SPECIFIC PROCEDURES

Approved club vote 8/15/2012

Published 10/9/2012

Recommended Procedures:

- 1) When a plane is down, available club members at the field should cease all other operations and assist in the recovery as necessary
- 2) At a minimum, one flight observer should spot for all planes
- 3) Pilots should communicate their intentions (coming out, on the runway, landing, clear of runway, etc.) to all other flying pilots
- 4) Normal landings should be made on the runway, its apron or extensions - not in the brush
- 5) Electric planes should be inspected after each flight. Batteries should be cool enough to be held tightly in the hand
- 6) Batteries that are swollen after cooling should not be used at the field
- 7) Before maiden flight and before the first flight after modification to the power system (e.g. motor, battery, ESC), aircraft should be tested prior to flying at the field to ensure the power system operates properly
- 8) After radio equipment modification, a range check should be conducted in accordance with the manufacturer's recommendations
- 9) Beware of snakes. **In Case of Snakebite:** Remain calm and call 911
- 10) Flyers operating on 72 MHz should display the frequency on their antenna and pin their membership cards to the frequency board on the frequency they are flying
- 11) The field should not be used when driving the access road causes ruts
- 12) Carry transmitters so as the thumb prevents open throttle

All club members are responsible for insuring safe flying procedures are followed.
